

SYSTEM NOTES

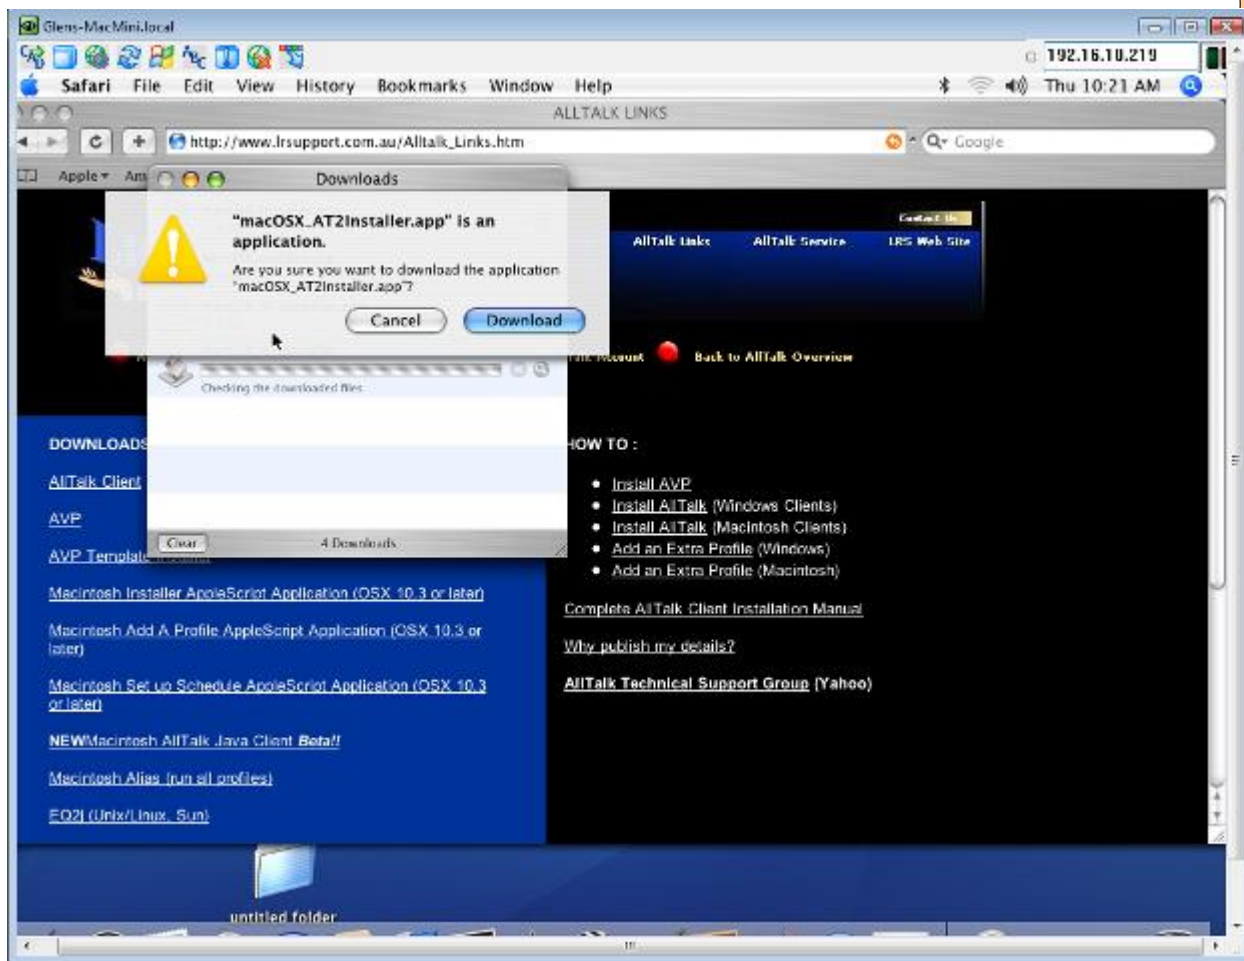

ALLTALK JAVA INSTALLATION

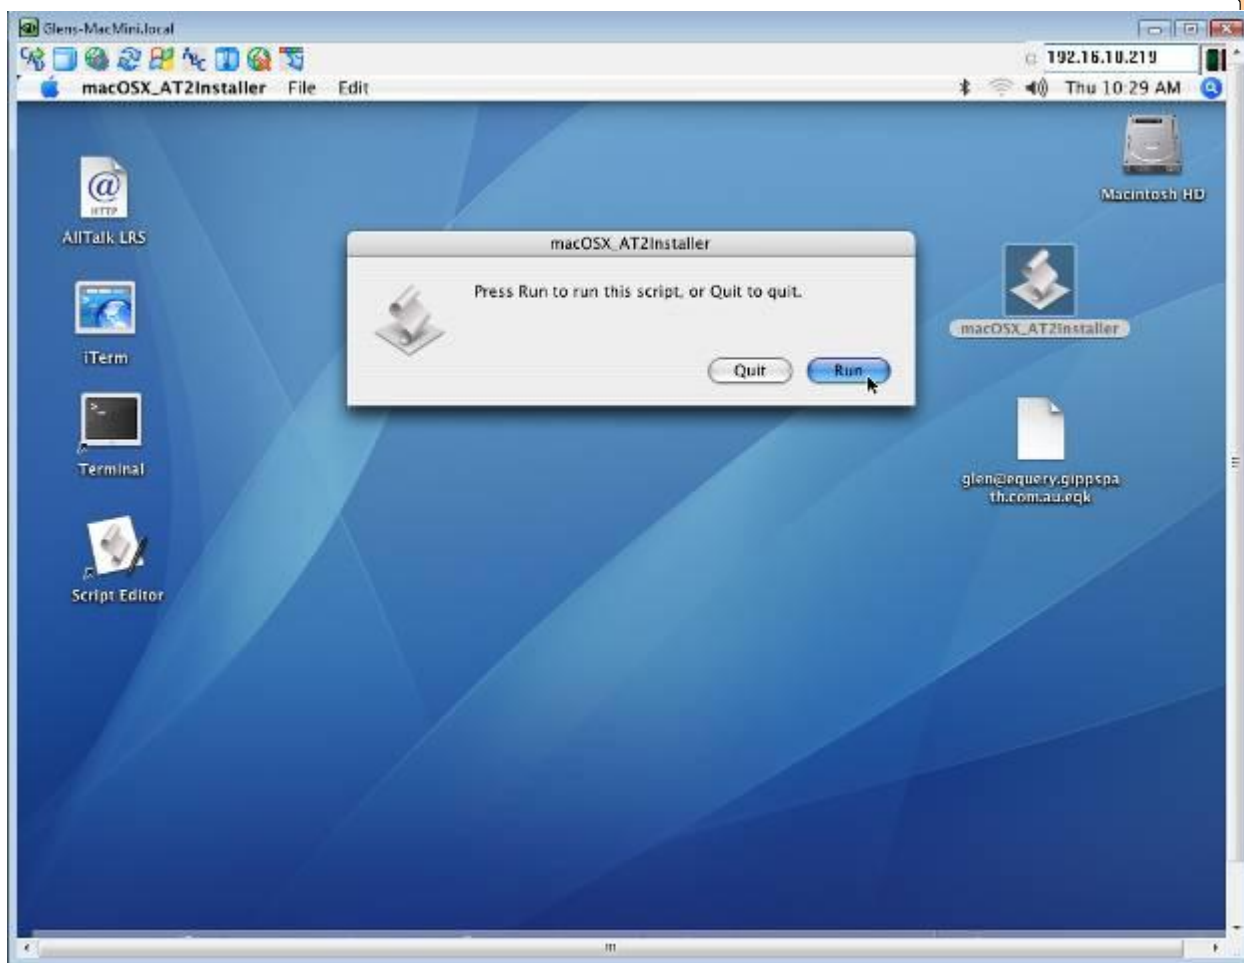

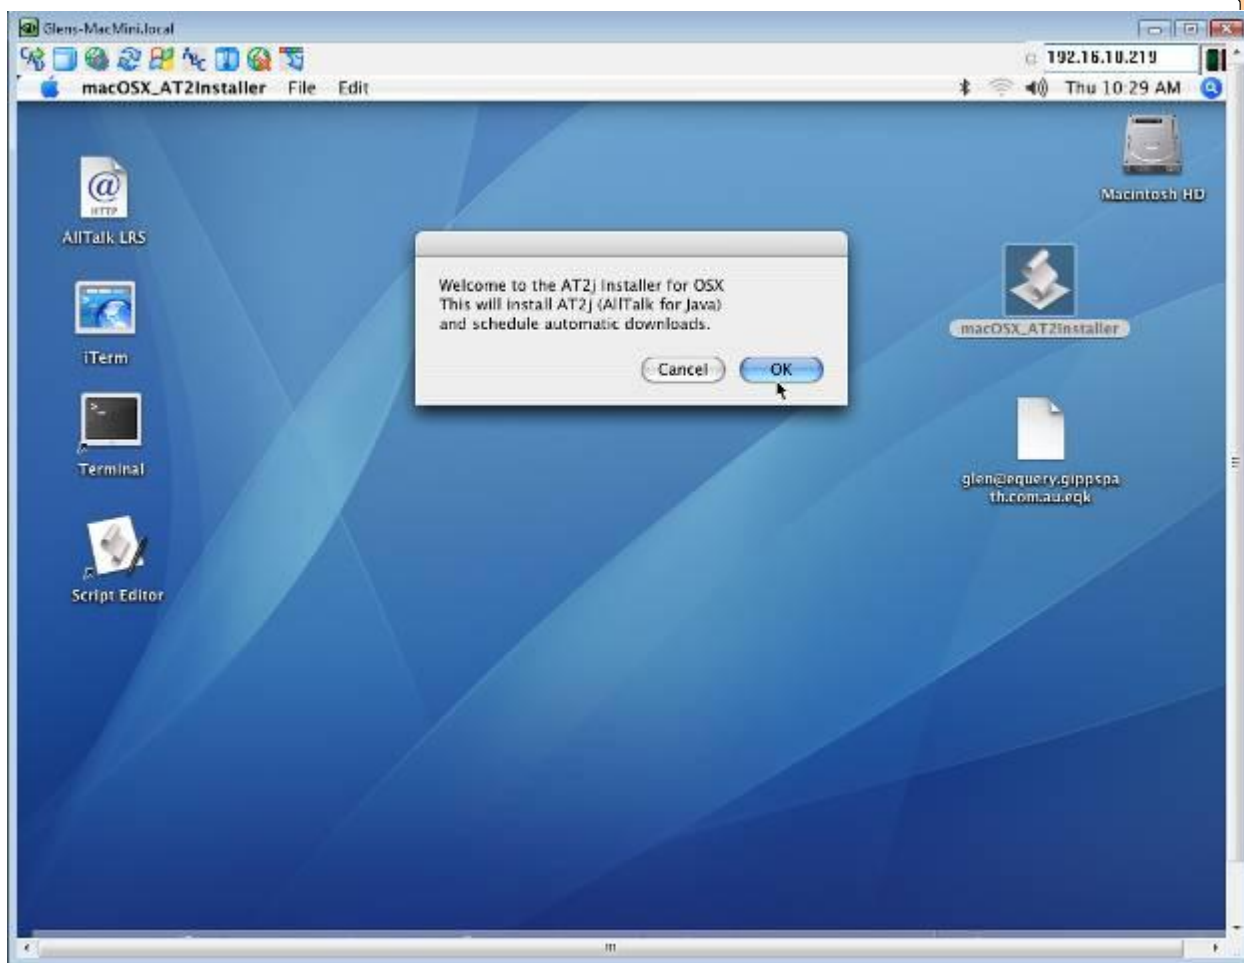

Author: Glen Kleidon
File Name: Alltalk_Java.doc
Date Created: 23.10.08
Last Updated:

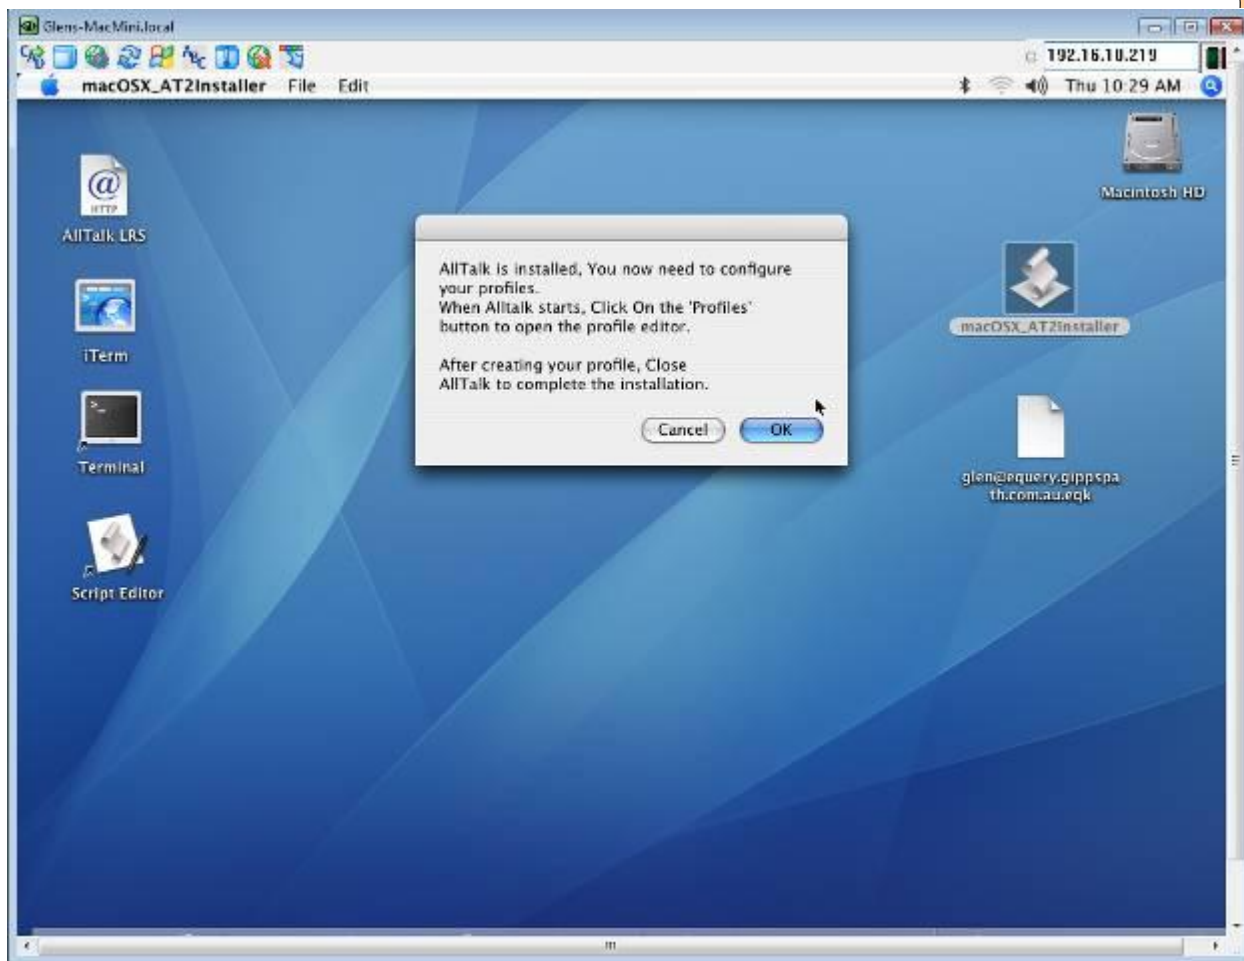

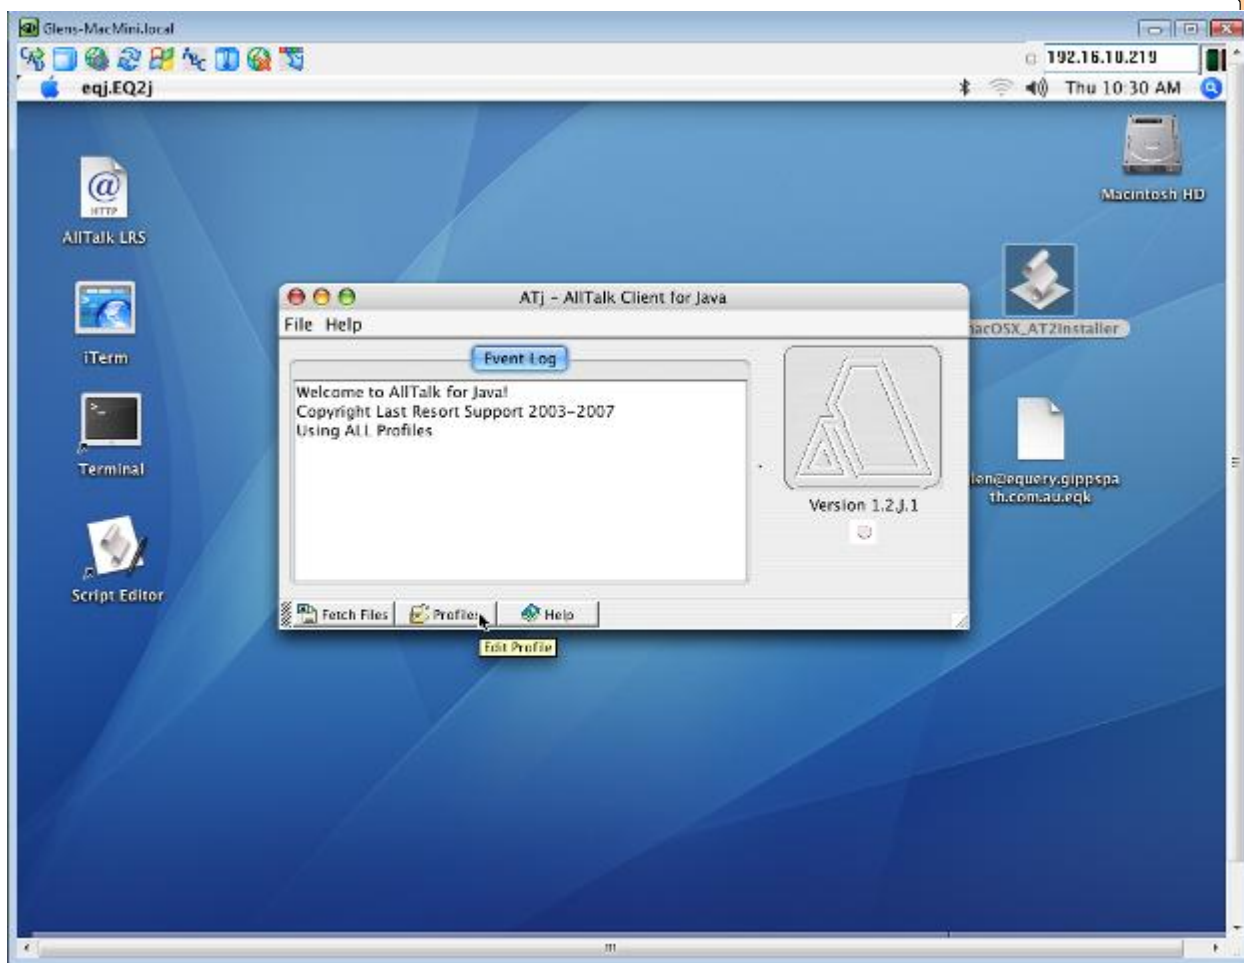

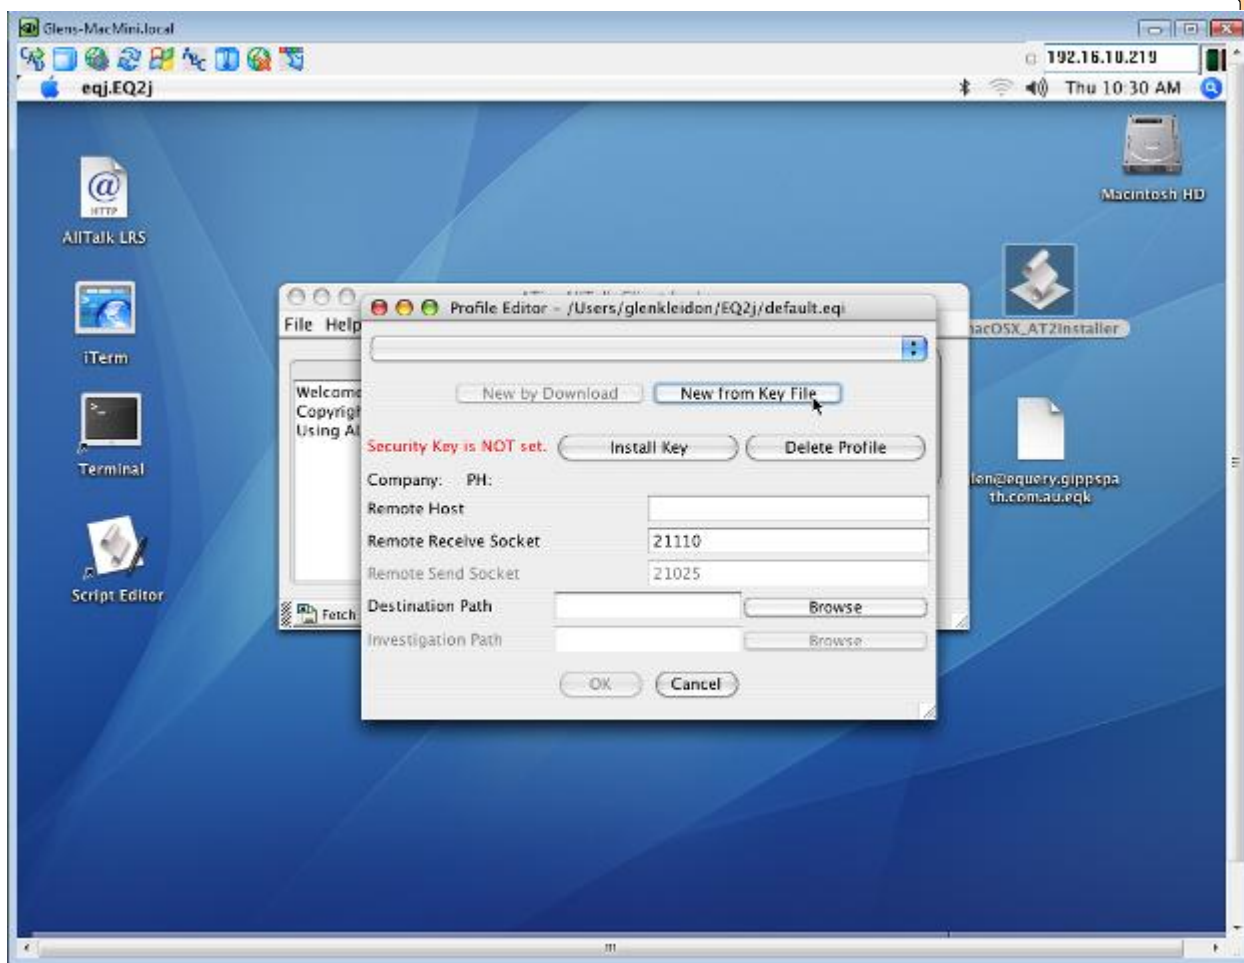

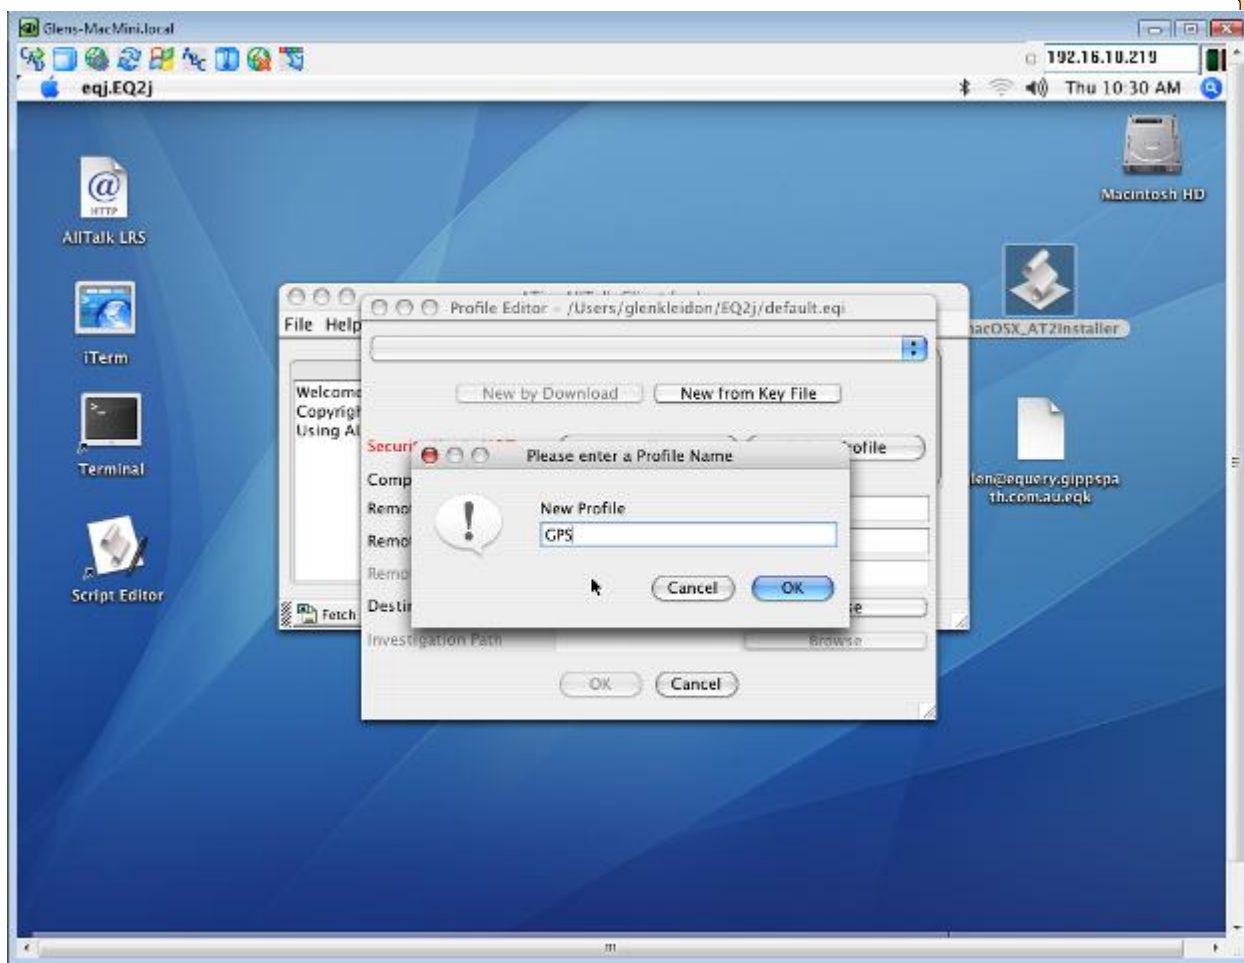

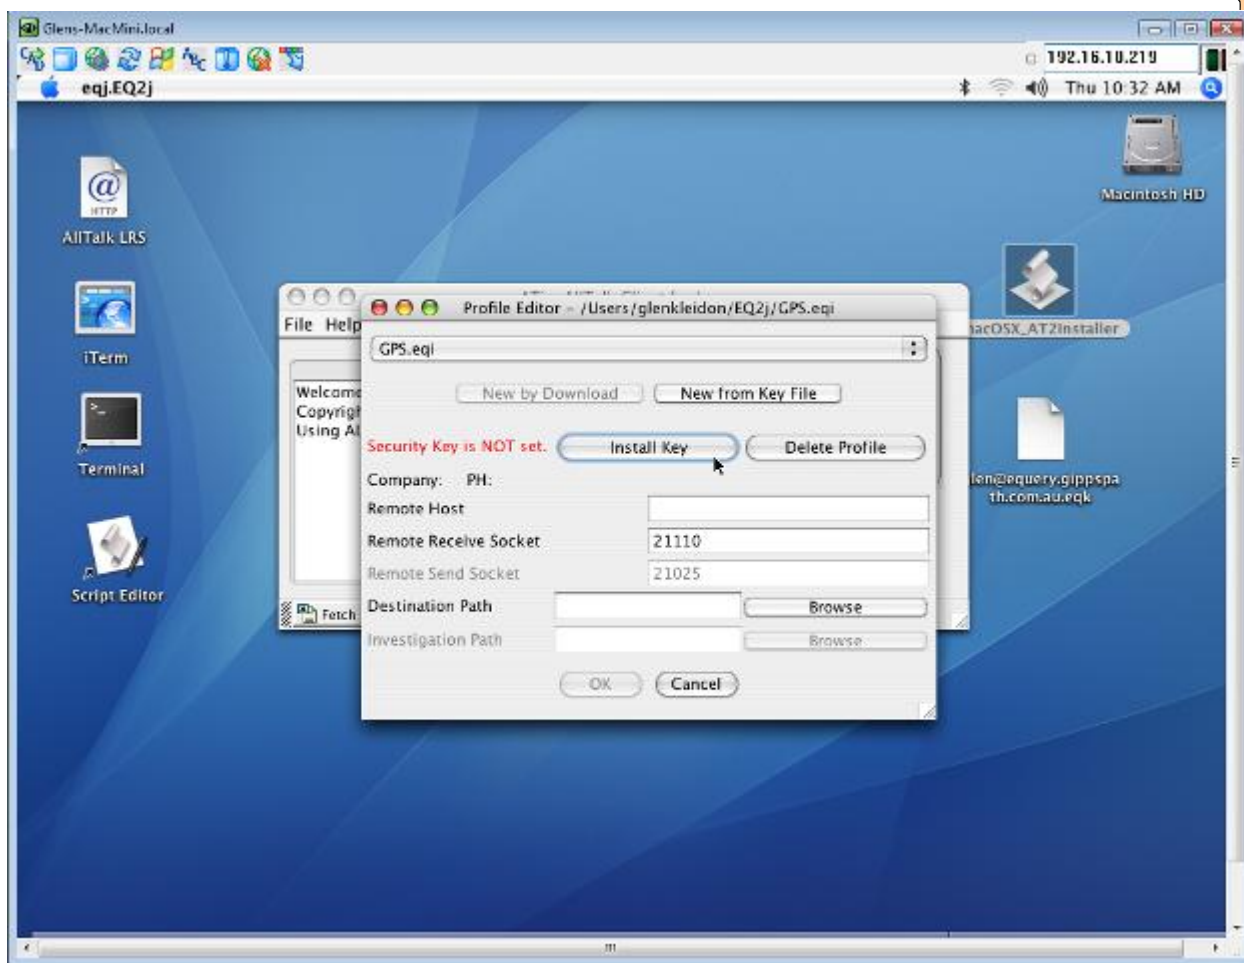

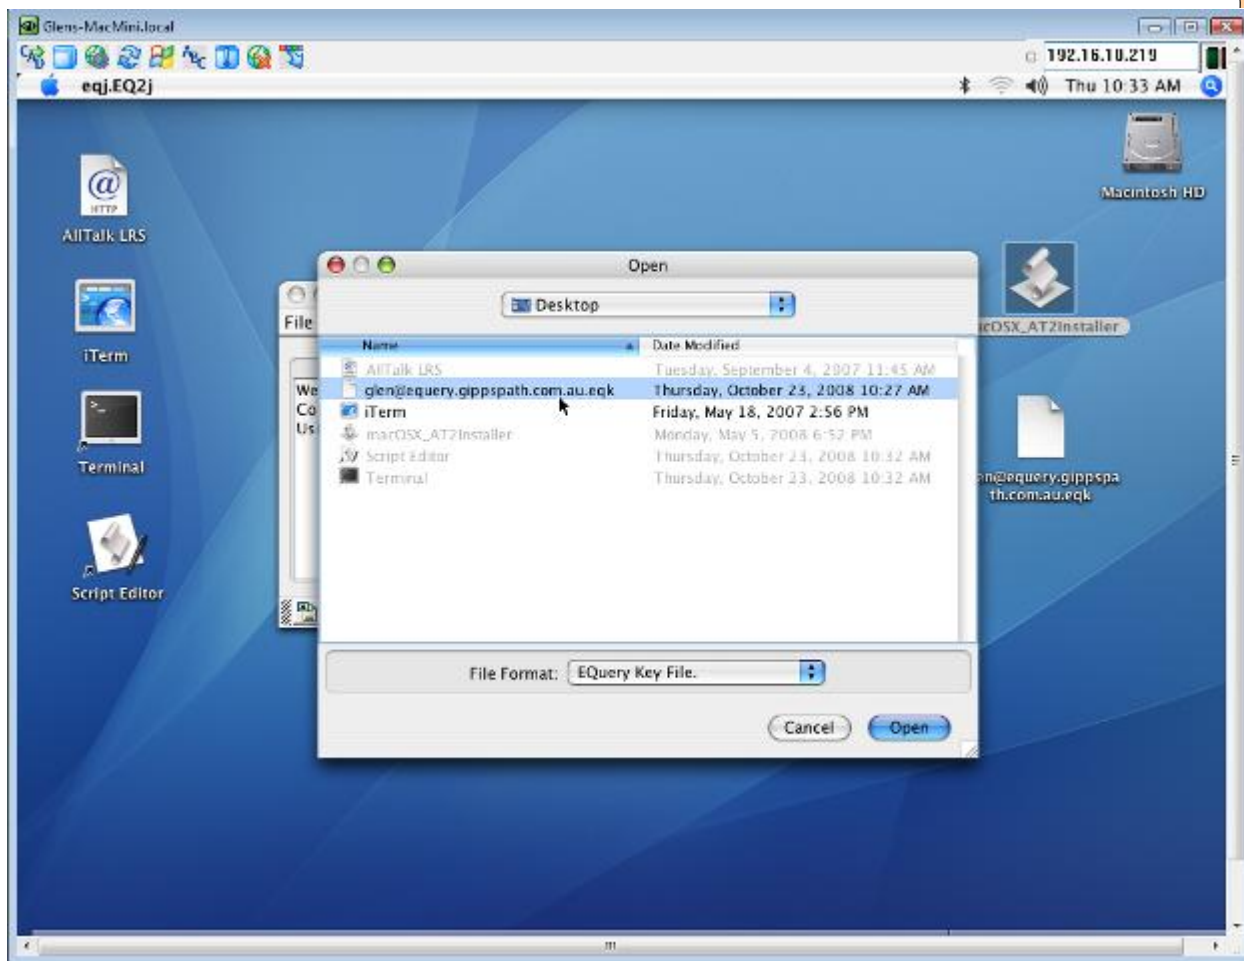

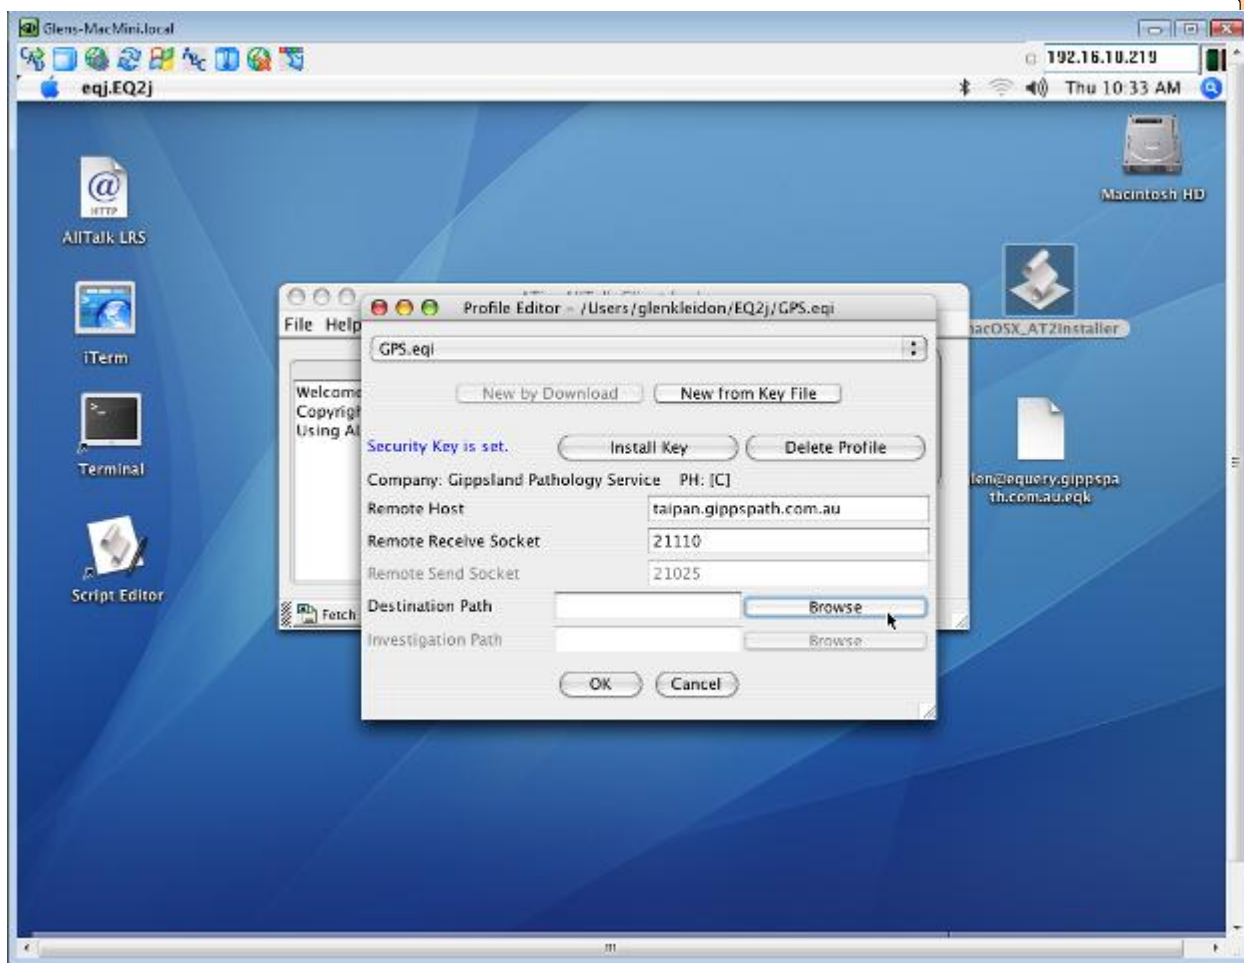

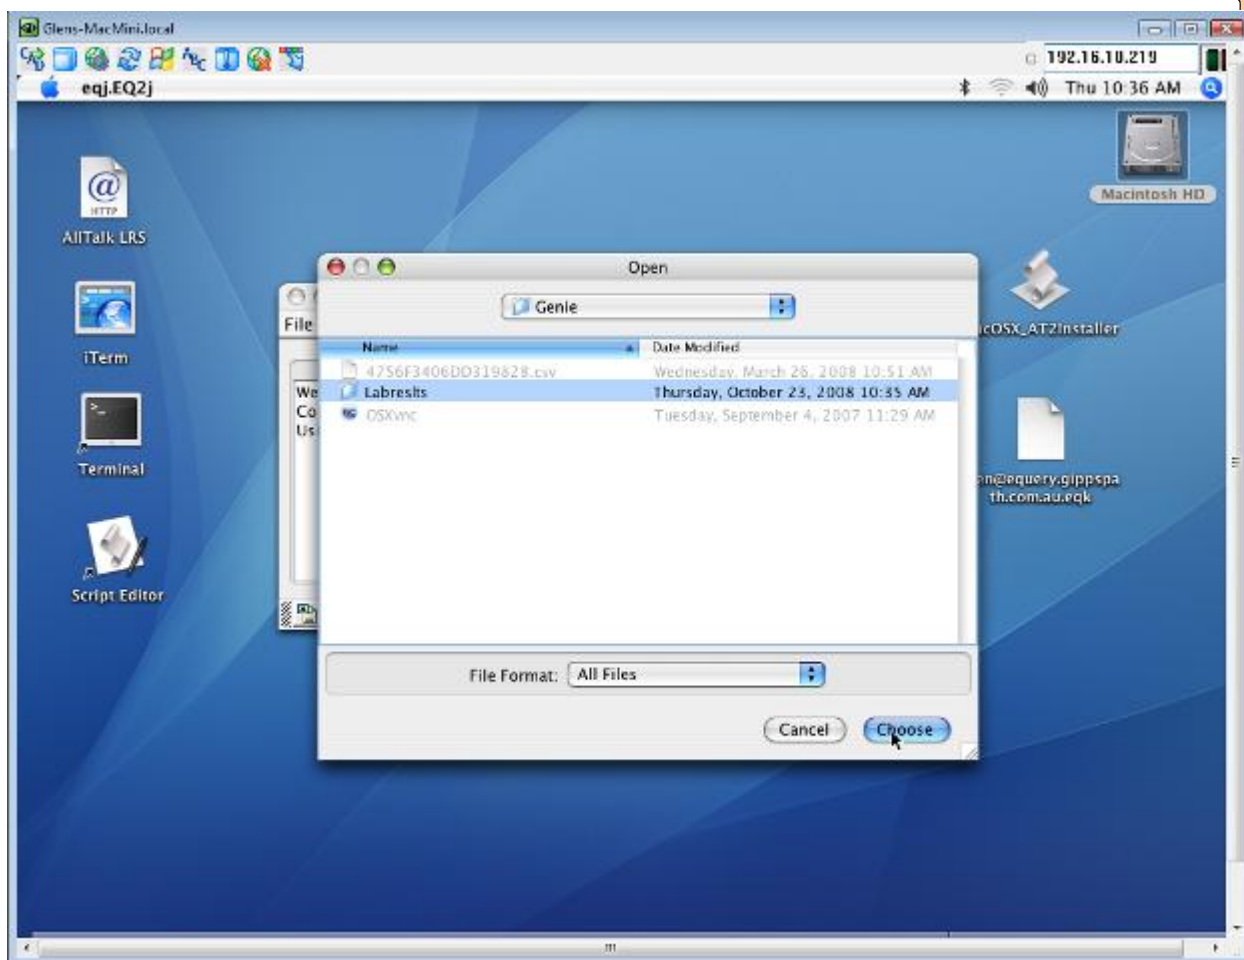

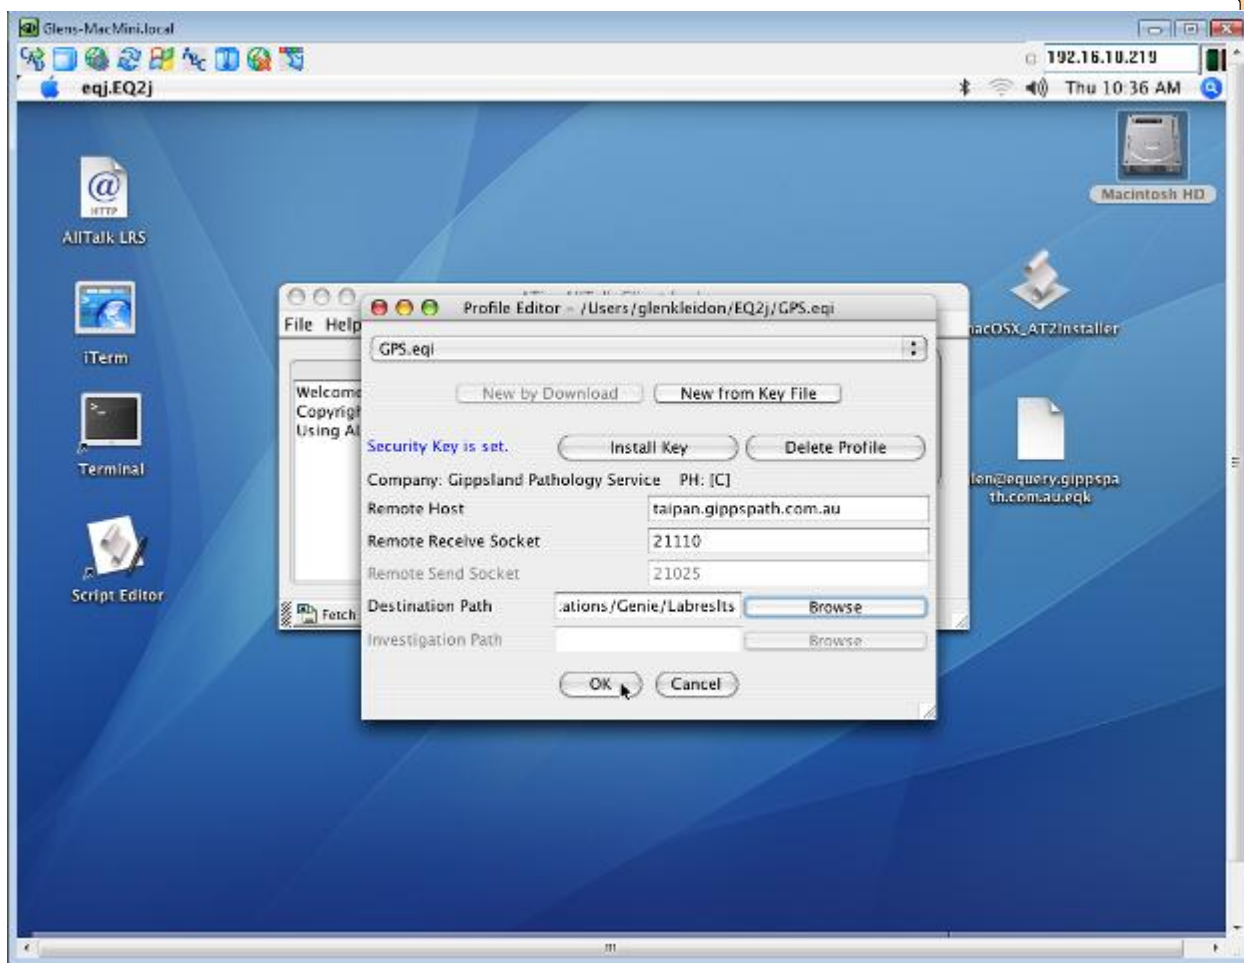

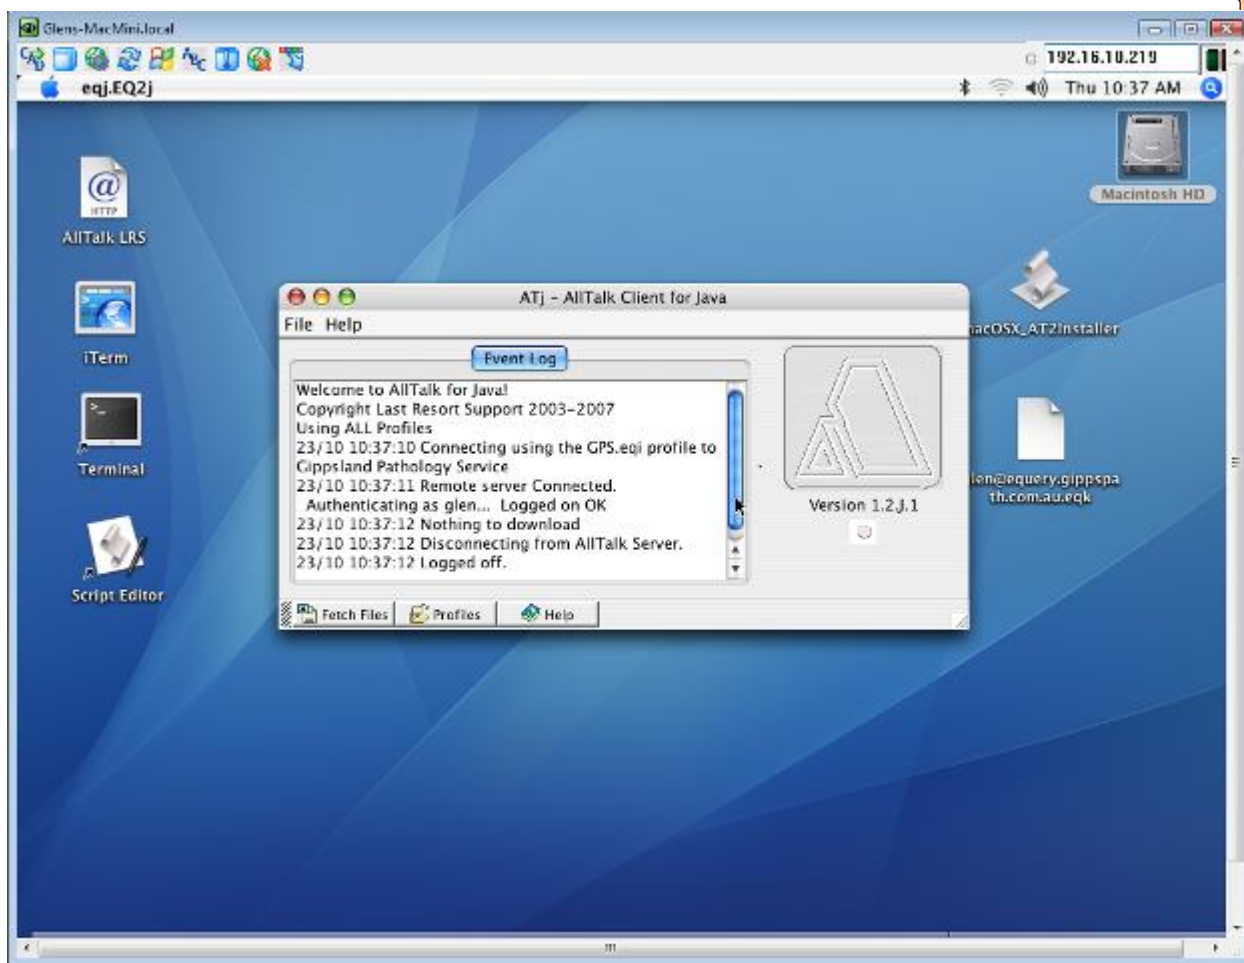

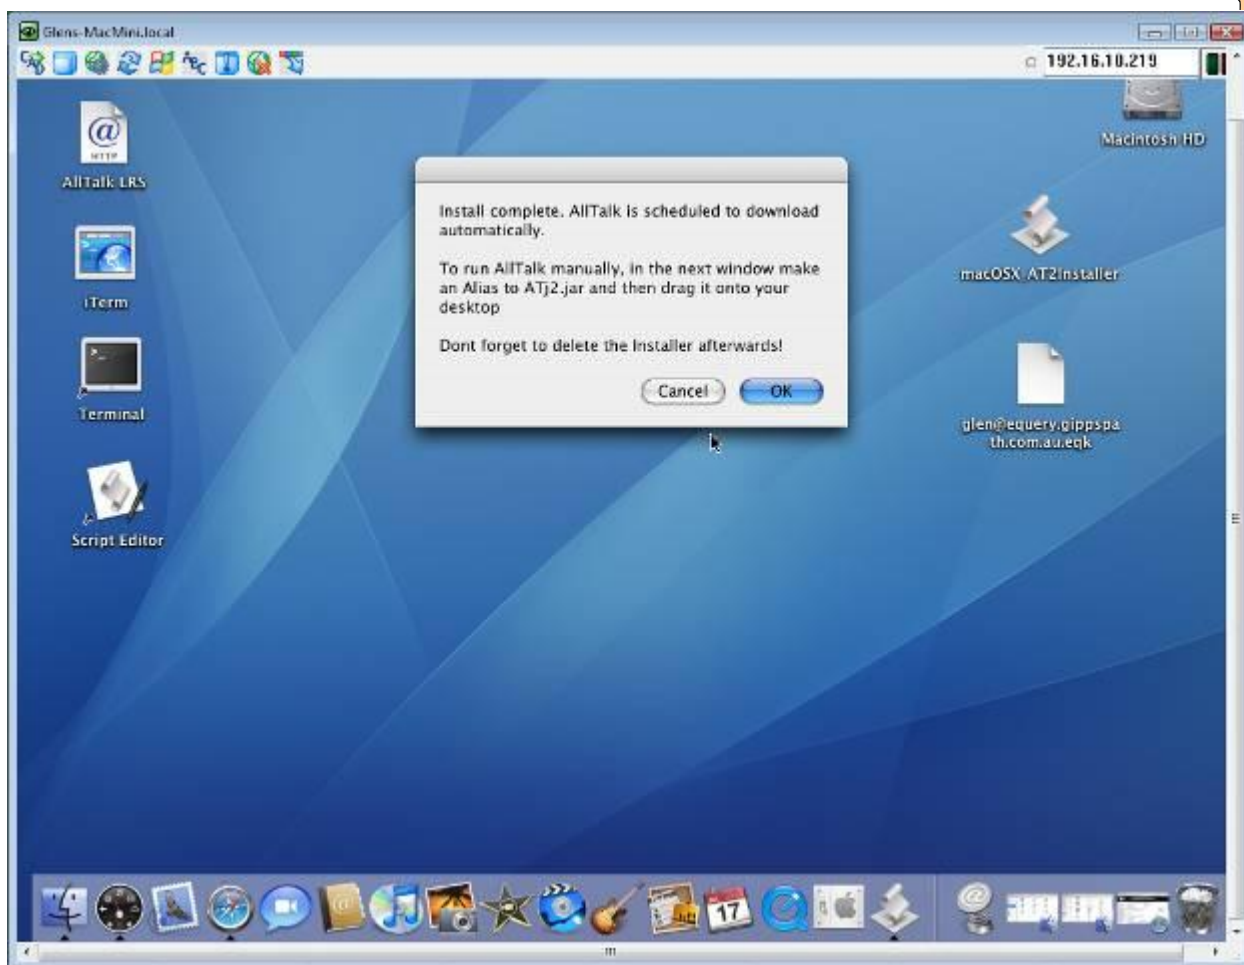

Now you can fetch Files.

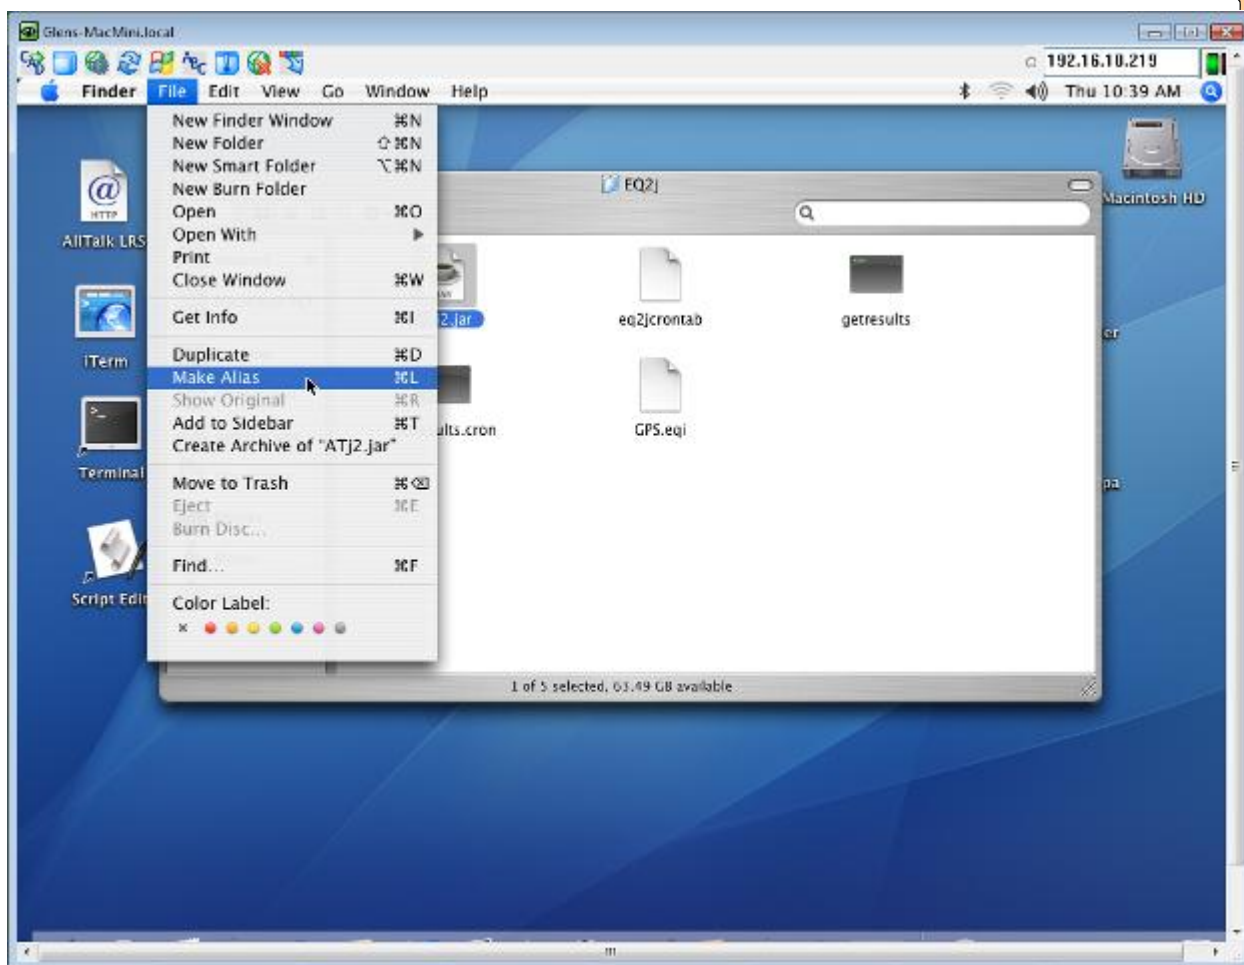

Close Application. Installer will then “Jump” on the Dock.

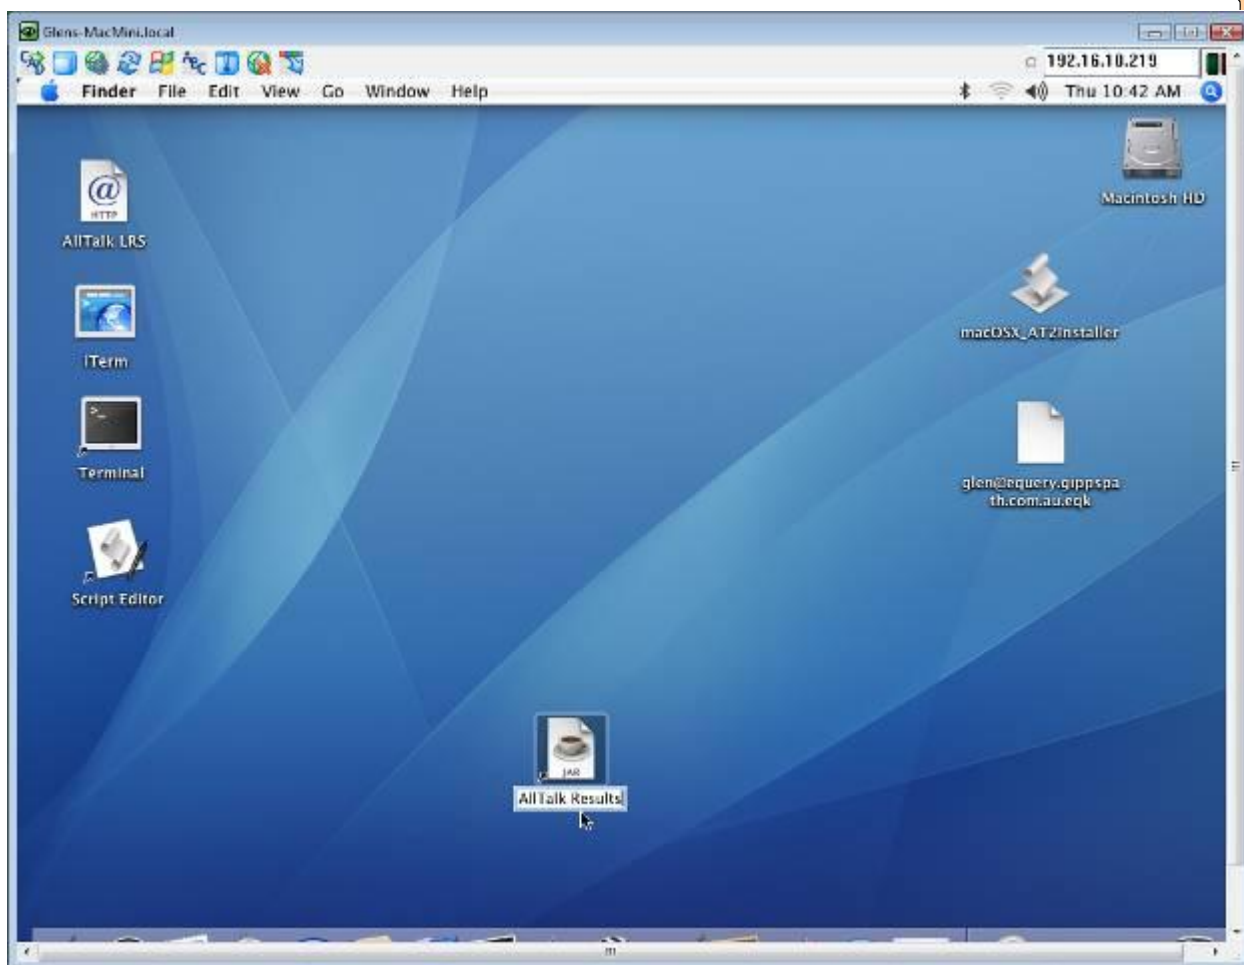

EQ2j folder will open. Click on AT2j.jar and create an alias

Close EQ2j folder and rename Alias.

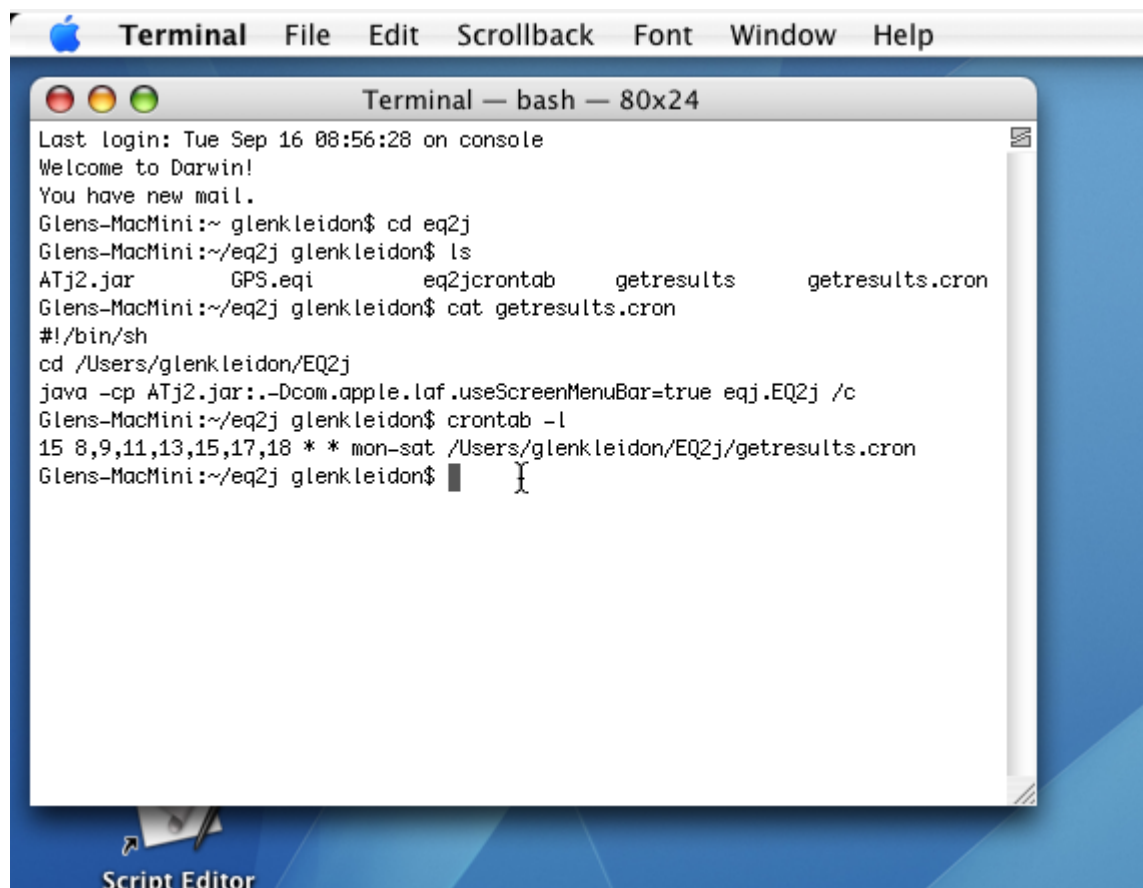

Downloads will be automatically scheduled so there is no need to use the Desktop Icon unless you want to manually download the files.

For Advanced users and system administrators . To check the scheduling.

Open terminal (Applications→system Tools→Terminal)

Changed to the EQ2j folder (`cd eq2j`) and inspect the getresults .cron shell script (`cat getresults.cron`). Then list crontab settings for this user (`crontab -l`)

```

Terminal  File  Edit  Scrollback  Font  Window  Help
Terminal — bash — 80x24
